DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/30/03 has been entered.

Claim Objections

2. Claims 6 is objected to because of the following informalities: in claim 6, line 26, the brackets before and after "at least" and before "one" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 5, 6, 9-11, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 15-17, it cannot be determined how the wallet opening is generally parallel to the opening of the enclosure.

Claim 5 depends on canceled claim 4, and claims 9-11 depends on canceled claim 8.

In claim 6 lines 23-28, and claim 19, lines 9-13, it is not understood what applicant intends to claim by the amendment.

In claim 20, line 20, "said at least one compartment" lack antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-3, 6, 7, 15, and 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Seamon (Pub. US 2002/0121322). Seamon discloses, in figs. 1- 3, a handbag comprising an enclosure 10, an external compartment 11 which is inaccessible through the storage space of the enclosure; the external compartment comprising a closure panel 16' pivotably movable toward and away from the enclosure; a wallet 17 having first and second walls 18 and 21 pivotably movable between closed and open conditions, the wallet being removably positioned within the external compartment and having an opening generally parallel to the opening of the enclosure when positioned

with the external compartment, the wallet having independent closure means (zipper); and mutually magnetically attractable devices 19, 19' (magnets, see paragraph [0011]) respectively attached directly to a respective the inner wall 15 and the closure panel 16' of the compartment and the first and second walls 18 and 20 of the wallet 2 (note that wall 20 is an extending portion of the wallet wall 21).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seamon. Seamon does not disclose the magnetically attachable devices being neodymium magnet. It would have been obvious to one skill in the art to provide the Seamon magnetically attachable devices made from material as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Response to Arguments

9. Applicant's arguments filed 6/30/03 have been fully considered but they are not persuasive.

Applicant argues that the present invention is different from the Seamon reference because the present invention includes a wallet having pivotable walls which

Art Unit: 3727

are attachable, without the use of a tab, to an inner wall of a compartment and the attachment devices are rare earth of neodymium type. However, that is not found convincing because the claimed invention only requires one of the walls of the wallet attachable to the inner wall of the compartment. The tab in the Seamon reference is an extending portion of one of the walls of the wallet, which is attachable to the inner wall of the compartment. Although Seamon does not disclose the attachment devices (magnets) are rare earth of neodymium type, it would have been obvious to one skill in the art to provide the Seamon magnetically attachable devices made from material as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lifton (2,562,499) teaches a handbag with a functional device attached to an exterior compartment.
